

App Review Notes — Your Date Genie v1.0

Thank you for reviewing Your Date Genie. Below is everything you need to test the full app, including premium features, in under five minutes.

Demo account

Email: apple-review@yourdategenie.com Password: [INSERT PASSWORD BEFORE SUBMITTING]

This account has an active premium subscription pre-applied, so all paid features (Memories, Partner Planning, unlimited date plan generation) are unlocked on sign-in. No payment is required to test.

Happy-path test (60 seconds)

1. Open the app — you land on the questionnaire.
2. Pick a city (try New York, NY), a vibe (try Romantic), and a date type (try Date Night).
3. Answer the 4 quick prompts (cuisine preference, budget, vibe, time of day).
4. Tap Generate. The plan generates in 8–12 seconds.
5. Review the 3-stop itinerary with venues, transit notes, and a story arc.
6. Tap Save. The plan appears in Memories (premium feature).

Premium features to test

Feature	Where	What it does
Memories	Bottom tab → Memories	Save and revisit any generated date plan; pre-populated with 2 sample plans for demo account
Partner Planning	Profile → Partner	Link a partner via email; co-plan together; demo account has a sandbox partner already linked
Unlimited Generate	Anywhere	Generate as many date plans as needed; free tier is capped at 2/day

Subscription compliance (Guideline §3.1.2)

The paywall is reached via Profile → Upgrade or by tapping any premium feature on the free tier. The paywall screen displays:

- Title of subscription (Your Date Genie Premium)
- Length (monthly or annual)
- Price per period (\$14.99/mo or \$99.99/yr — \$8.33/mo equivalent for annual)
- 7-day free trial disclosure with auto-renewal language
- Restore Purchases button
- Privacy Policy link (opens <https://yourdategenie.com/privacy>)
- Terms of Use link (opens <https://yourdategenie.com/terms>)
- Apple Standard EULA reference

Auto-renewal disclosure is the exact Apple-required wording: “Payment will be charged to your iTunes Account at confirmation of purchase. Subscription automatically renews unless auto-renew is turned off at least 24 hours before the end of the current period.”

Sign in with Apple (Guideline §4.8)

Sign in with Apple is offered as the first authentication option on the welcome screen. It has equal prominence to email sign-up and creates a complete account without requiring additional data collection. We also support email/password and Google Sign-In.

Block + Report (Guideline §1.2)

The Partner Planning feature allows users to block and report partners. Reports route to hello@yourdategenie.com and are reviewed within 24 hours. Blocked users cannot re-link or message. To test:

1. Sign in with the demo account.
2. Profile → Partner → tap the sandbox partner’s name.
3. Tap the three-dot menu → Report or Block.

Known issues (planned for v1.0.1, week of 2026-06-08)

- Premium feature unlocks during the 7-day free trial use a cached entitlement that refreshes on next app open; users report a 30–60 second delay seeing unlocked content on first trial start. Fix is staged and will ship in v1.0.1 alongside Custom Terms of Use.
- Minor UI polish on the dark-mode paywall — copy is legible but contrast can be improved.
- Custom Terms of Use page currently uses Apple’s Standard EULA. Custom Terms ship in v1.0.1.

Disclaimers (in-app)

All venue hours, prices, and availability are sourced from Google Places at the time of plan generation. In-app copy reads: “Verify hours and prices with the

venue before you go — things change fast.” This appears below every venue card.
